No one builds a better fire

6000 Series

Direct Vent Gas Fireplaces

The best & brightest

Cover: 6000GLX shown with Portico mantel in chocolate maple, black granite with curved hearth and Galleria operable doors in new bronze finish

A. **6000GL** shown with Sonoma mantel in ginger knotty alder, cross-cut travertine and Valencia operable doors in aged brass finish

B. **6000GLX** shown with Cornerstone surround, Cultured Stone's Chardonnay Limestone and Chateau Deluxe front in new bronze finish

C. **6000GL** shown with Hearst cast mantel, cast stone hearth and insert panels, and Halston front in graphite finish

It's the one that started a revolution. In 1987, the 6000 Series introduced direct vent technology, making it the most sought after gas fireplace on the market. Today, the 6000 Series still combines beautiful design with the latest innovations, plus an impressive selection of mantels, fronts and finishes. All at a range of prices—for every type of project and any size budget. The best just keeps getting better.

6000GLX, our exceptional luxury model, comes standard with all the Series' features: 3-burner system with dual Flame-Out-of-Log burners and the fully concealed Mystifire® burner, our patented accent lighting system and our most advanced wall control, the IntelliSwitch300.

6000GL includes many 6000 Series upgrades as standard features: 2-burner system with single Flame-Out-of-Log burner and the fully concealed Mystifire burner, and choice of brick refractory colors.

6000GLX shown with Portico mantel in chocolate maple, black granite with curved hearth and Arcadia front in new bronze finish

6000 Series

Best-in-class design and features

6000G shown with Parsons mantel in chocolate knotty alder, cross-cut travertine and Halston operable doors in graphite finish

6000GCF shown with Cultured Stone's Ohio Cobblefield and Firescreen front in black finish

6000GCF delivers clean face design plus a flush hearth installation option, for the seamless, masonry-like finish usually found with more expensive fireplaces.

6000G is perfect for more moderate budgets. It's the ideal combination of technology, features and price.

Finishes

Four rich finishes. High on style, long on durability.

Aged Brass

Advanced Technologies

The 6000 Series is loaded with state-of-the-art, patented innovations.

1 Flame-Out-of-Log Technology
Adds another burner inside of the logs, providing a more realistic flame appearance and better flame height.

2 Mystifire Burner
Concealed, multi-level, textured burner molded directly into the hearth refractory. Improves flame height, eliminates metal burner, and best replicates a woodburning ash bed.

3 Accent Lighting
Adds year-round ambience with or without the fire.

4 IntelliSwitch Controls
User-friendly controls let you operate fireplace functions without going underneath the fireplace.

Our advanced technologies let us create different flame "ages" and looks.

A younger fire with yellow flames concentrated in the center of the box with less glow

6000G and 6000GCF
Mystifire burner and 30,000 Btu/Hour input

A maturing fire with spreading flames, plus more glow on the logs and embers

6000GL
Single Flame-Out-of-Log burner plus Mystifire burner and 30,000 Btu/Hour input

A very mature fire, blending larger flames with lots of glow spread throughout the firebox

6000GLX
Dual Flame-Out-of-Log burners, Mystifire burner and 40,000 Btu/Hour input

Heat-Zone®
Optional Heat-Zone climate control system turns your fireplace into a flexible, energy-saving heat source by transferring excess heat from your fireplace to other locations in your home.
Not available on 6000GCF.

Heat Duct
Optional Heat Duct system improves furnace efficiency and room comfort by pulling excess heat away from the fireplace, out of the hearth room and into your furnace's cold air return ducting.
Not available on 6000GCF.

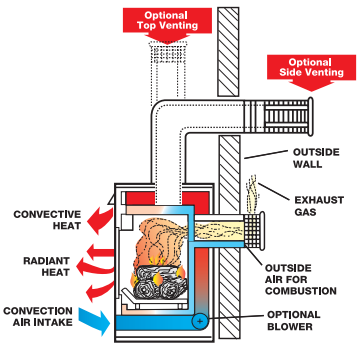
Limited Lifetime Warranty*
The strongest in the industry, Heat & Glo provides a lifetime warranty on the most important aspects of the fireplace: fiber logs, stainless steel burner, firebox and heat exchanger.

IntelliFire™
Our exclusive, state-of-the-art IntelliFire ignition system reduces gas consumption and thermogenerator wear by providing a pilot flame only when needed. Also supplies a backup battery system to run the fireplace during a power outage.

*For full warranty details, go to www.heatnglo.com

Healthy Hearth
Our direct vent fireplaces feature a sealed combustion chamber that draws in fresh air from outdoors and discards all combustion by-products back outside. Recognized by the American Lung Association® Health House® program as a Clean Air Choice.™

Direct Venting System



AMERICAN LUNG ASSOCIATION. HEALTH HOUSE.

Dimensions above are in inches. Reference dimensions only. We recommend measuring individual units at installation. Assumes the use of 1/2" drywall. NOTE: Combustible material should not be installed over the face. Make sure you do NOT cover the decorative door opening.

Refer to installation manual for detailed specifications on installing this product. Heat & Glo reserves the right to update units periodically. The flame and ember appearance may vary based on the type of fuel burned and the venting configuration used. Pictures in this brochure are not a true representation of the fireplace and/or flames.
